CORE Module

DATA ELEMENT/HELP TEXT	ADDITIONAL NOTES	RESPONSE OPTIONS
Chart ID		
Site		
Managing/Treating Physician (optional)		
Primary Site Anatomic site of the cancer diagnosis <ul style="list-style-type: none">• 4-digit or 5-digit ICD-10-CM code for the patient's most recent or primary diagnosis (principal neoplastic disease code).	<ul style="list-style-type: none"> • Do not enter ICD-10 codes related to symptoms or toxicities. • ICD-10 codes are only accepted if within the invasive malignancy range provided. • Use the most relevant code for the purpose of the abstraction. For example, use the code for the patient's specific type of cancer, even if the most recent recorded visit denotes some other condition. • The ICD-10 code selected will determine which pre-selected modules are applicable to the chart. For example, if your site selected the breast cancer module and C50.219 is entered, the chart will be tagged for the breast cancer module and all applicable questions will open for that chart. If the breast cancer module wasn't selected, the chart will be tagged as "Other" and will only be applicable to the core data elements and any domain modules selected. • For charts of patients diagnosed in the 16-month period, exclude patients with simultaneous bilateral breast cancer or 2 distinct cancers in one breast. • Exclude cases with ductal or lobular carcinoma in situ (DCIS) only. Cases with invasive malignancy and DCIS may be included and abstraction should focus on the invasive malignancy only. • Male breast cancer is C50.92x. Charts of male patients with invasive breast cancer may be abstracted for QOPI but will not apply to the breast cancer module. • Breast: C50.x (Female breast cancer). • Colorectal: invasive adenocarcinoma of the colon: C18.x (C18.1 cancer of the appendix will be excluded from several colorectal measures), C19 or rectum: C20.x, C21.x • NSCLC: Non-small cell only: C34.x. • NHL: C82.x, C83, C84, C85, C86. Indolent NHL may be included. • GYNONC: Primary peritoneal: C48.1, C48.2, C48.8, Ovarian: C56.x, Fallopian tube: C57, C57.01, C57.02 • Prostate: C61, C61.0, C61.00 	<input type="checkbox"/> ICD _____
