

## QOPI® Abstraction for Moderate or High Emetic risk Chemotherapy

Indicate whether any moderate or high emetic risk chemotherapy drugs were administered to the patient at any time during his/her therapy. Include drugs administered offsite if the treatment was overseen by the reporting practice.

Check the chemotherapy flow sheet (or elsewhere in the chart if a chemotherapy flow sheet is not present) to determine if any of the moderate emetic risk chemotherapy drugs specified in Table 1 were administered to this patient in or overseen by the practice. If a threshold dose is provided in Table 1 answer 'Yes, moderate emetic risk' only if the dose administered meets the specified threshold. Repeat for table 2 for high emetic risk drugs.

Table 1 Moderately Emetogenic Agents			
Drug Generic Name	Drug Trade Name	Alternate Name	Threshold Dose
Alemtuzumab	Campath		N/A
Azacitidine	Vidaza		N/A
Bendamustine	Ribomustin and Treanda		N/A
Carboplatin	Carboplatinum	Paraplatin	N/A
Clofarabine	Clolar		N/A
Cyclophosphamide	Cytoxan	Neosar	Less than 1500 mg/m <sup>2</sup>
Cytarabine	Cytosar	Ara-C	Greater than 1000 mg/m <sup>2</sup>
Daunorubicin (without cyclophosphamide)	Cerubidine		N/A
Doxorubicin (without cyclophosphamide)	Adriamycin		N/A
Epirubicin (without cyclophosphamide)	Ellence		N/A
Idarubicin (without cyclophosphamide)	Idamycin		N/A
Ifosfamide	Ifex		N/A
Irinotecan	Camptosar		N/A
Oxaliplatin	Eloxatin		

<b>Table 2 Highly Emetogenic Agents</b>			
<b>Drug Generic Name</b>	<b>Drug Trade Name</b>	<b>Alternate Name</b>	<b>Threshold Dose</b>
Carmustine	BeCNU	BCNU	N/A
Cisplatin	Platinol	CDDP	N/A
Cyclophosphamide	Cytoxan		Equal to or greater than 1500 mg/m <sup>2</sup>
Cyclophosphamide + Daunorubicin	Cytoxan + Cerubidine		Any combination involving both of these drugs given on the same day
Cyclophosphamide + Doxorubicin	Cytoxan + Adriamycin		Any combination involving both of these drugs given on the same day
Cyclophosphamide + Epirubicin	Cytoxan + Ellence		Any combination involving both of these drugs given on the same day
Cyclophosphamide + Idarubicin	Cytoxan + Idamycin		Any combination involving both of these drugs given on the same day
Dacarbazine	DTIC		N/A
Dactinomycin	Actinomycin –D		N/A
Mechlorethamine	Mustargen	Nitrogen mustard	N/A
Streptozocin	Zanosar		N/A

<b>Table 3 Low Emetogenic Agents</b>	
5-Fluorouracil	Methotrexate
Bortezomib	Mitomycin
Cabazitaxel	Mitoxantrone
Catumaxumab	Paclitaxel
Cytarabine ≤ 1,000 mg/m <sup>2</sup>	Panitumumab
Docetaxel	Pemetrexed
Doxorubicin HCL liposome injection	Temsirolimus
Etoposide	Topotecan
Gemcitabine	Trastuzumab
Ixabepilone	Ixempra

<b>Table 4 Minimal Emetogenic Agents</b>	
2-Chlorodeoxyadenosine	Pralatrexate
Bevacizumab	Rituximab
Bleomycin	Vinblastine
Busulfan	Vincristine
Cetuximab	Vinorelbine
Fludarabine
