

MOQC Excellence in Quality Certification (MEQC)

What is MEQC?

MEQC offers an opportunity for medical and gynecologic oncology practices to be recognized for their efforts in advancing high-quality care to their patients. MEQC works with collaborative teams including physicians, nurses, medical assistants, abstractors, and patients and caregivers with the purpose of enhancing focus on value-driven, patient-centered care.

Required Elements for Certification

- Collect 2 rounds of data during the year in which certification is pursued, including a minimum of 10 charts per measure per round*
- Meet specified measure targets
- 1 physician and 1 practice administrator must attend 1 of 2 biannual meetings (January and June) AND the fall regional meeting
- Complete site visits every 2 years*
- Create a Closing the Gap Action Plan
- Collect Patient Reported Outcomes (PROs) data each year during the pursuit of certification

MEQC Benefits

- 12% VBR to offset the costs of care transformation
- Recognition as a MOQC Excellence in Quality Certified practice
- Comprehensive site visit provides an itemized report with strengths and opportunities for improvement within your organization
- Improve the care experience for your patients
- Receive data from PROs survey to identify the needs of your patients to enhance holistic care
- Support from the MOQC coordinating team to keep your practice aligned on a path for success
